

CWordTM Toolkit Usage on BBC News

This Jupyter notebook demonstrates how to use the package "CWordTM" on the BBC News:

1. Meta Information Features
2. Utility Features
3. Text Visualization - Word Cloud
4. Text Summarization
5. Topic Modeling - LDA and BERTopic

```
In [1]: import warnings
warnings.filterwarnings('ignore')
```

1. Meta Information Features

```

2. Utility Features

Load BBC News

```
In [10]: bbc_file = "BBC/BBC News Train.csv"
df = util.load_text(bbc_file, info=True)
```

Dataset Information:
 <class 'pandas.core.frame.DataFrame'>
 RangeIndex: 1490 entries, 0 to 1489
 Data columns (total 3 columns):
 # Column Non-Null Count Dtype

 0 ArticleId 1490 non-null int64
 1 Text 1490 non-null object
 2 Category 1490 non-null object
 dtypes: int64(1), object(2)
 memory usage: 35.0+ KB

Preprocessing Text

```
In [11]: text_list = util.get_text_list(df.iloc[:500], text_col='Text')
text = util.preprocess_text(text_list)
```

3. Text Visualization - Word Cloud

```
In [12]: # White background with no image mask
viz.show_wordcloud(text)
```

D:\Dev\Anaconda3\lib\site-packages\wordcloud\wordcloud.py:106: MatplotlibDeprecationWarning: The get_cmap function was deprecated in Matplotlib 3.7 and will be removed two minor releases later. Use ``matplotlib.colormaps[name]`` or ``matplotlib.colormaps.get_cmap(obj)`` instead.
 self.colormap = plt.cm.get_cmap(colormap)

```
In [13]: # Black background with the prescribed image as the mask
viz.show_wordcloud(text, bg='black', image='images/disc.png')
```

D:\Dev\Anaconda3\lib\site-packages\wordcloud\wordcloud.py:106: MatplotlibDeprecationWarning: The get_cmap function was deprecated in Matplotlib 3.7 and will be removed two minor releases later. Use ``matplotlib.colormaps[name]`` or ``matplotlib.colormaps.get_cmap(obj)`` instead.
 self.colormap = plt.cm.get_cmap(colormap)

4. Text Summarization

```
In [14]: news = df.iloc[:5]['Text'] # "df" stores previously loaded text
         ta.summary_en(news, sent_len=5)
```

```
Out[14]: ['but ms cooper who now runs her own consulting business told a jury in new york on wednesday that external auditors arthur andersen had approved worldcom s accounting in early 2001 and 2002. she said andersen had given a green light to the procedures and practices used by worldcom.',
          'cynthia cooper worldcom s ex-head of internal accounting alerted directors to irregular accounting practices at the us telecoms giant in 2002. her warnings led to the collapse of the firm following the discovery of an $11bn (£5.7bn) accounting fraud.',
          'prosecution lawyers have argued that mr ebberts orchestrated a series of accounting tricks at worldcom ordering employees to hide expenses and inflate revenues to meet wall street earnings estimates.',
          'the university of california said the trial in the case is scheduled to begin in october 2006. it joined the lawsuit in december 2001alleging massive insider trading and fraud claiming it had lost $145m on its investments in the company.',
          'the bbc s david willey in rome says one reason for that result is the changeover from the lira to the euro in 2001 which is widely viewed as the biggest reason why their wages and salaries are worth less than they used to be.']
```

5. Topic Modeling

LDA Model

```
In [15]: doc_file = "BBC/BBC News Train.csv"
lda = tm.LdaProcess(doc_file, source=1, text_col='Text', eval=True, timing=True)
```

```

Some weights of the model checkpoint at bert-base-uncased were not used when initializing BertModel: ['cls.predictions.decoder.weight', 'cls.predictions.transform.LayerNorm.weight', 'cls.predictions.transform.dense.weight', 'cls.predictions.bias', 'cls.seq_relationship.weight', 'cls.seq_relationship.bias', 'cls.predictions.transform.dense.bias', 'cls.predictions.transform.LayerNorm.bias']

- This IS expected if you are initializing BertModel from the checkpoint of a model trained on another task or with another architecture (e.g. initializing a BertForSequenceClassification model from a BertForPreTraining model).
- This IS NOT expected if you are initializing BertModel from the checkpoint of a model that you expect to be exactly identical (initializing a BertForSequenceClassification model from a BertForSequenceClassification model).
